2 After use, syringe is placed into roller at top. The closed container helps prevent accidental needle sticks.

3 Knob rotates until syringe drops into container. Once filled, UltiGuard becomes an environmentally safe disposal unit.

1 One package of syringes is removed at a time. Syringes stay neat and organized.

## FACTS:

Each year in the U.S. over 2 billion syringes are disposed of incorrectly.

The estimated cost of needle stick injuries is approximately \$1.6 billion per year.

Syringes disposed of incorrectly effect everyone; family members, friends, co-workers, children, trash collectors, etc.

There has never been a cost effective convenient solution for diabetics to dispose of syringes.

**FINALLY!!** There is a unique syringe line that gives syringe users an option to safely dispose of their used syringes at no extra cost.
